DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 3/7/07 has been entered.

Information Disclosure Statement

The examiner has considered the items listed in the Information Disclosure Statement filed 3/07/07. A signed copy of Form PTO-1449 is herewith enclosed.

Response to Amendment

Amendment filed 3/7/07 with said Request for Continued Examination forms the basis for this action. In said Amendment Applicants substantially amended the claims through substantial amendment of all independent claims. Claim 27 remains withdrawn although currently amended. Claims 23-26 are being examined. Comments on Remarks submitted with said Amendment are included below under "Response to Arguments".

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

1. **Claims 23-26** are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claims contain subject matter not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventors, at the time the application was filed, had possession of the claimed invention.

Specifically, the limitation "wherein the passivation layer is in contact with the doped region" (lines 8-9 of claim 1) does not have support in the Specification, because, although said passivation layer 122 does contact a doped region, but only doped region 142), the claimed "doped region" is a doped region different from 142, because inner landing pad 112a is recited to be disposed on the doped region: the only doped region inner landing pad 112a is disposed on is doped region 144, not doped region 142. Therefore, said limitation constitutes new matter.

Response to Arguments

Applicant's arguments filed 3/7/07 have been fully considered but they are not persuasive. Specifically, although the amendment overcomes the rejections (both those over Hong and those over Tu) made in the previous office action and no prior art was found after a new search, the limitation "wherein the passivation layer is in contact with the doped region" (lines 8-9 of claim 1) does not have support in the Specification, because, although said passivation layer 122 does contact a doped region, but only doped region 142), the claimed "doped region" is a doped region different from 142, because inner landing pad 112a is recited to be disposed on the doped region: the only

doped region inner landing pad 112a is disposed on is doped region 144, not doped region 142. Therefore, said limitation constitutes new matter.

Finally, as also noted by Applicants, it is only upon allowance of a generic claim that rejoinder is in order, and hence claims 27 remains withdrawn from consideration.
